Report Description

Voice picking solutions are a crucial element of logistics' outbound procedures, and they have a significant impact on the company's customer service. Employees can communicate with host systems via a voice-based user interface, such as portable voice terminals and headsets, provided by the voice picking system. Voice picking solutions, in general, include the majority of the warehouse workforce and improve warehouse operations by increasing staff productivity and efficiency through accuracy in the product picking process. Distribution, retail, and manufacturing organizations use voice picking systems to save the cost of running a distribution center.
